Research Fields

Microeconomic Theory and Entrepreneurial Finance

Teaching Experience

Summer 2026, 2025, 2024

Intermediate Microeconomics
Instructor

Spring 2026, Spring 2025	Political Economy (T), NYU Teaching Assistant for Professor Arjada Bardhi
Fall 2025, Fall 2024	Game Theory I, NYU Stern Teaching Assistant for Professor Erik Madsen
Fall 2026, Fall 2025, Spring 2024, Fall 2024, Fall 2023	Intermediate Microeconomics, NYU Teaching Assistant for Professor Viplav Saini
Spring 2023	Intermediate Microeconomics, NYU Teaching Assistant for Professor Basil Williams
Fall 2022	Microeconomics I (PhD Core), NYU Teaching Assistant for Professor Ariel Rubinstein

Research Experience and Other Employment

Sept 2020 - Jul 2021	Centre for Advanced Financial Research and Learning, Reserve Bank of India, Research Associate
Sept 2020 - Jul 2021	Research Assistant for Professor Mausumi Das
Jun 2019 - Jul 2019	Barclays Global, Fraud Analytics Intern

Professional Activities and Conferences

2027	Co-organizer of Graduate Women in Economic Theory Conference at Columbia University
2026	Southern Finance Association 2026 (scheduled), EGSC at Washington University in St. Louis (scheduled), 37th Stony Brook International Conference on Game Theory, North American Econometric Society Summer Meeting at Emory University
2025	Finance Theory Group Summer School at University of Washington, Annual Economics Conference at Ahmedabad University
2024	19th Annual Conference on Economic Growth and Development at Indian Statistical Institute in Delhi
2023 - 2025	Co-organizer of NYU Micro Theory Student Lunch

Scholarships and Grants

2021-2026	Henry M. MacCracken Doctoral Fellowship
2026, 2025, 2024	C. V. Starr Travel Grant
2024	GSAS Dean's Student Travel Grant
2019	Prof. Late Suresh D. Tendulkar Memorial Scholarship
2018	Delhi University Post Graduate Scholarship
2017, 2016	KPMG Merit Scholarship

Research

Financing Innovation under Reputation Concerns (Job Market Paper)

This paper studies how reputation benefit from investor backing affects project financing when the entrepreneur privately observes failure. Continued backing improves the market's perception of the project and gives the entrepreneur a reason to delay disclosure. The investor designs a contract to obtain failure information while controlling funding and compensation costs. I show the optimal contract features early discipline, with prompt disclosure and termination, followed by failure tolerance, with delayed disclosure. Allowing delay later weakens the market's interpretation of continued funding and reduces the cost of inducing early disclosure. The model predicts a startup hype cycle, bimodal termination times and systematic variation in failure tolerance across investors and ventures.

Venture Capital Contract with Informed Investors

A cashless entrepreneur designs a contract backed by future cash flows to raise funds from an informed investor. The entrepreneur can exert costly effort to improve payoff relevant outcome where the marginal benefit depends on the quality of the project. The quality of the project is observed privately by the investors. This study investigates the optimal contract that an entrepreneur proposes to an investor given these two specific information frictions. In equilibrium, a trade-off emerges between the surplus maximization of projects of different qualities. In particular, this tradeoff creates an endogenous preference for risk by the entrepreneur when designing the menu of contracts. The results are applied to predict the effect of divergence in the entrepreneur's subjective beliefs on the project's outcome and overall efficiency in the economy.
